

DIMAS PRASETYO TEGAR ASMORO

Chief Technology Officer | VP Engineering | Head of IT & Product

Jakarta Metropolitan Area, Indonesia · +62 821 1475 1004 · dimasboim@gmail.com · [linkedin.com/in/dimasprasetyotegar](https://www.linkedin.com/in/dimasprasetyotegar) · dimas-prasetyo.com

EXECUTIVE PROFILE

Technology executive with two decades in software engineering and more than a decade leading technology and product functions at C-level. Currently CTO of PadiUMKM, PT Telkom Indonesia's national B2B marketplace for the MSME ecosystem, after progressing from Head of Engineering to VP Engineering to CTO in three years. Track record spans state-owned enterprise, pharmaceutical and healthtech (Kalbe Group), agritech, and venture-backed marketplaces — consistently taking ownership of the messy middle: legacy modernization, delivery discipline, platform reliability, security posture, and the applied-AI agenda. Hands-on enough to review architecture and code; senior enough to own budget, vendor strategy, org design, and the board conversation.

LEADERSHIP SIGNATURE

Strategy to impact. Translate commercial goals into a sequenced technology roadmap with explicit bets, boundaries, and measurable outcomes across product, platform, and data.

Systems over heroes. Build standards, tooling, and platform foundations that make the right thing easy — so delivery velocity survives team changes.

Scaling teams. Grow accountable, high-trust engineering organizations with real leadership pipelines, pragmatic process, and coaching that produces successors.

SELECTED CAREER HIGHLIGHTS

- **Promoted Head of Engineering → VP Engineering → CTO** within three years at PadiUMKM, now accountable for engineering, architecture, information security, and platform strategy of a national MSME marketplace operating inside Indonesia's largest telecommunications group.
- **Embedded applied AI** into daily operations — a natural-language-to-SQL assistant over BigQuery that lets non-technical commercial stakeholders self-serve GMV and revenue analysis, plus automated classification and triage of inbound bug reports — reducing analyst turnaround on routine data requests from [X hours] to [Y minutes].
- **Led an end-to-end QA transformation** for a live microservices marketplace: contract-first API development, a shared engineering process commitment across squads, and a TypeScript/Playwright automation stack — cutting production defect escape rate by [X] %.
- **Raised reliability and security posture** through zero-downtime deployment patterns for NestJS microservices (graceful shutdown, health probes, rolling updates), centralized secret and certificate management with HashiCorp Vault, transport-security and email-authentication hardening, and capacity planning modelled on CCU-to-DAU traffic behaviour.
- **Acted as incident commander** for severity-level production incidents, then institutionalized the response: a severity classification framework, structured 5-Whys post-mortems, and enforced follow-through on corrective actions.
- **Held two consecutive leadership mandates in Kalbe Group** — Head of IT for Klik Dokter and Hallobumil, then Head of IT & Product at Cakra Radha Mustika — covering regulated healthtech platforms and nationwide pharmaceutical distribution systems.
- **Grew with Campaign.com** from Country Head Indonesia to CTO over nine years, scaling the engineering and mobile platform behind a regional digital campaign business.

PROFESSIONAL EXPERIENCE

Chief Technology Officer

PadiUMKM — PT Telkom Indonesia (Tribe SMB) · Jakarta · Dec 2022 – Present

Progression: Head of Engineering (2022–2023) → VP Engineering (2024) → CTO (present). Accountable for the full engineering organization, architecture, delivery, security, and technology roadmap of Telkom's B2B marketplace serving Indonesian MSMEs and state-enterprise procurement.

- Own the technology strategy and multi-year platform roadmap; represent engineering to tribe leadership and business stakeholders on prioritization, capacity, risk, and investment.

- Lead the applied-AI agenda: conversational analytics for business users (LLM → SQL → BigQuery), AI-assisted operational workflows, and evaluation of internal versus third-party model strategy — including deployment on Telkom's internal model platform alongside external providers.
- Direct modernization of a live microservices estate: service architecture, zero-downtime release engineering, observability, and internal platform tooling and dashboards integrating multiple enterprise data sources.
- Established quality engineering as a discipline — contract-first API design, automated regression coverage, and a written cross-team process commitment replacing ad-hoc handovers.
- Own information security and operational risk: secret and certificate lifecycle management, transport and email-authentication hardening, and incident response governance.
- Build the engineering organization — hiring, role architecture, performance management, and mentoring of leads into managers.

Vice President of IT

PT Eden Pangan Indonesia (Edenfarm) · Jakarta · Nov 2022 – Dec 2022

- Led the IT and engineering function of a B2B agritech supply-chain platform, covering team management, systems ownership, and technology planning during a leadership transition.

Head of IT & Product

PT Cakra Radha Mustika — Kalbe Group · Jakarta · Nov 2021 – Nov 2022

- Set the technology strategy for the distribution arm of one of Southeast Asia's largest pharmaceutical groups — evaluating, selecting, and implementing new systems and infrastructure.
- Led both the IT engineering and product management teams, aligning roadmap, delivery, and business operations under a single accountable function.
- Managed vendor selection, budget, and enterprise integration across distribution and commercial systems.

Head of IT — Klik Dokter & Hallobumil

PT Medika Komunika Teknologi — Kalbe Group · Jakarta · Sep 2020 – Nov 2021

- Owned technology strategy and delivery for two consumer healthtech platforms through the peak of pandemic-driven digital health demand.
- Rebuilt infrastructure and systems foundations for scale and availability; managed the IT engineering team and third-party partners.

Chief Technology Officer, Campaign.com

PT Uni Tokopo Teknologi · Jakarta · 2016 – Sep 2020

- Defined and executed company technology strategy for a regional digital campaign platform; owned architecture, infrastructure, and engineering investment decisions.
- Built and led the full technology team across web, mobile, and backend; established delivery process and release discipline.
- Partnered directly with the CEO and commercial leadership on product direction and go-to-market technology enablement.

Project Leader, Tokopo.com · Country Head Indonesia, Campaign.com

PT Uni Tokopo Teknologi & Pratu Pte Ltd · Jakarta / Singapore · 2011 – 2016

- Led development of web and mobile products and ran IT project management for a Singapore-headquartered venture, then took country-level accountability for Indonesia.
- Managed the local technology team and served as the delivery bridge between regional headquarters and the Indonesian market.

EARLIER CAREER

- **Senior Java Developer — Brighten & Richness IT Consultant (2010–2011).** Java programming on Oracle, Eclipse, and TIBCO; user-facing analysis, testing, and implementation.
- **Senior Web Developer & System Analyst — PT Bhinneka Mentari Dimensi / PT Bhinneka Pandu Teknologi (2009–2010).** IT project management, system analysis, product demonstration, and maintenance for Indonesia's pioneering e-commerce group.
- **Senior Programmer — PT Explorindo Total Solusi (2006–2009).** Enterprise development in .NET, Microsoft SQL Server, Oracle, and Java; team and schedule management across client engagements.
- **Selected delivery portfolio (2004–2016).** Enterprise systems delivered across financial services, multifinance, manufacturing, hospitality, and industry associations — including a mutual-fund (Reksadana) system for PT Nikko Securities Indonesia, a Java J2EE multifinance platform for Ciptadana and Artha Prima, an HR system for Hitachi Construction Machinery, membership systems, and digital platforms for Kadin DKI Jakarta, Bhinneka.com, and Sido Muncul.

ACADEMIC & ADVISORY

Lecturer (Lektor), 2007 – present. ITB Swadharma (2007–2020) and STMIK Jayakarta (2021–). Teaching software development and computer science to undergraduate cohorts alongside a full-time executive career.

Advisory. Advisor to founders and operators from seed to Series B on product-market fit, first-generation platforms, and early engineering hiring; enterprise transformation guidance on operating models, cloud migration, data platforms, and vendor strategy; technical and commercial due diligence for investors.

Speaking & mentoring. Talks on engineering leadership, platform building, and organizational design at Southeast Asian technology events; ongoing 1:1 mentoring of engineering managers and staff engineers.

EDUCATION

Master of Science, Computer Science — Universitas Bunda Mulia, 2009–2012. Specialization in software development and e-commerce. Cum laude, GPA 3.73/4.00. Best Graduate, 2012.

Bachelor of Science, Computer Science — STMIK Swadharma, 2003–2007. Specialization in software development. Cum laude, GPA 3.71/4.00. Best Graduate, 2007.

CAPABILITIES & TECHNOLOGY

Leadership. Technology strategy · Org design and operating models · Engineering management · Hiring, coaching, succession · Stakeholder and board communication · Budgeting, FinOps, and cost optimization · Vendor and partner management

Delivery. Product strategy and roadmapping · Agile and lean delivery · Portfolio governance · Quality engineering and test automation · Incident management and post-mortem discipline

Architecture & platform. Microservices and distributed systems · APIs and enterprise integration · Cloud (GCP, AWS, Azure) · DevOps, SRE, CI/CD · Observability and performance · Security, compliance, and risk · Data engineering and analytics · AI/ML strategy and applied LLM systems

Hands-on. Go · Java/Kotlin · TypeScript/Node.js · C#/.NET · PHP · Swift/Objective-C · NestJS · Next.js · React · PostgreSQL/Supabase · BigQuery · Playwright · HashiCorp Vault · Docker/Kubernetes · n8n · LLM orchestration

ADDITIONAL

Languages. Bahasa Indonesia (native) · English (professional working proficiency)

References. Senior engineering and C-level references available on request.
